PROFESSIONAL SUMMARY

Motivated AI & Data Science engineering student with hands-on experience building and deploying real-world applications — from autonomous AI research agents and healthcare tools to music players and travel planners. Passionate about leveraging Python, generative AI, and modern APIs to solve meaningful problems. Actively seeking internship and project opportunities to contribute to innovative, data-driven teams.

EDUCATION

B.Tech – Computer Science & Engineering (AI & Data Science)

2025 – 2028 (Pursuing)

Marwadi University, Rajkot, Gujarat

Diploma – Computer Engineering

2022 – 2025

Marwadi University, Rajkot, Gujarat | **CGPA: 8.28 / 10**

EXPERIENCE

Front-End Development Intern

May 2024 – Jun 2024

Bytesbizz Technologies, Rajkot

- Built and refined responsive web interfaces using modern front-end technologies.
- Collaborated with cross-functional teams to translate design wireframes into functional UI components.
- Gained hands-on experience with Tailwind CSS for rapid, utility-first styling.

PROJECTS

CareScribe.ai – AI-Powered Patient Intake | [Live Demo](#) | Python, Claude API, OpenAI API, Tailwind CSS, Vercel

- Built an AI-powered healthcare communication tool that converts multilingual patient descriptions (Gujarati, Hindi, English) into structured, doctor-ready summaries in under 2 seconds.
- Integrated real-time emergency symptom detection with instant alerts and HIPAA-compliant data handling with end-to-end encryption.
- Designed an intuitive intake interface with PDF export and a human-verification workflow, bridging the gap between patients and medical staff.

LuminaTrip – AI Travel Planner | [Live Demo](#) | Python, Flask, Google Gemini API, Tailwind CSS, Vanilla JS, Vercel

- Developed an intelligent travel planning application that generates comprehensive, personalized itineraries from a single prompt in under 10 seconds.

- Engineered a full pipeline: AI-driven destination suggestions, day-wise timelines, categorized budget breakdowns, and interactive packing checklists.
- Implemented PDF export functionality for complete itinerary portability and offline access.

Safar – Music Player | [Live Demo](#) | *JavaScript, Tailwind CSS, Vercel*

- Designed and deployed a clean, responsive music player web application with a modern UI.
- Implemented core playback controls, track management, and a smooth user experience optimized for all screen sizes.

Limbus – Autonomous AI Research Agent | [Live Demo](#) | *Python, Gemini 2.5 Flash API, Tavily Search API, Tailwind CSS, Render*

- Developed and deployed a full-stack autonomous AI research agent with real-time, dynamic web data retrieval.
- Integrated Gemini 2.5 Flash and Tavily Search API for intelligent query handling and up-to-date information synthesis.
- Engineered a mobile-responsive UI with an incognito-style memory system for enhanced user privacy.

CineMatch – Movie Recommendation Engine | [Live Demo](#) | *Python, Streamlit, Streamlit Cloud*

- Built and deployed a dynamic movie recommendation system with a user-friendly search and discovery interface.
- Integrated in-app movie trailer playback for a seamless end-to-end user experience.

SpendScout – Personal Finance Tracker | [Live Demo](#) | *Python, Streamlit, SQLite, Plotly*

- Built a comprehensive finance tracker with full CRUD functionality and a persistent SQLite database.
- Integrated Plotly for advanced KPI visualizations and added CSV export for seamless data portability.

Air Canvas – Gesture-Controlled Drawing App | *Python, OpenCV, Computer Vision*

- Engineered a real-time computer vision app translating hand gestures into digital drawings on a virtual canvas.
- Achieved 75,000+ LinkedIn impressions upon launch, demonstrating strong community engagement.

GestureShooter – Real-Time Gesture Recognition Game | *Python, Machine Learning, OpenCV*

- Developed an interactive ML application using computer vision for real-time gesture recognition gameplay.
- Published as an open-source repository for community access and contributions.

TECHNICAL SKILLS

Languages: Python, SQL, R

Libraries & Frameworks: Streamlit, Flask, Plotly, OpenCV, Pandas, NumPy, Tailwind CSS, Machine Learning Frameworks

Tools & Platforms: SQLite, Streamlit Cloud, Render, Vercel, Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Tavily Search API, Gemini API, Claude API, OpenAI API

Core Areas: Artificial Intelligence, Data Science, Autonomous Agents, Computer Vision, Full-Stack Web Development, Healthcare AI, Data Visualization, Predictive Modeling

Soft Skills: Problem Solving, Team Collaboration, Self-Learning, Attention to Detail

CERTIFICATIONS & COURSES

ACHIEVEMENTS & ACTIVITIES

- Earned 75,000+ organic impressions on LinkedIn for the Air Canvas project launch — showcasing strong professional communication and project presentation skills.
- Active participant in the Canva Community events, collaborating with creators and designers on visual communication challenges.
- Consistently builds and deploys full-stack AI and data science applications as a self-driven learner outside academic curriculum.
